

Enabling Customer Subnet Data (optional)

There are several areas inside of the TrueDEM Portal where customer subnet data can be depicted. In order to supplement TrueDEM Data with this additional Subnet data, the customer needs to share a CSV file with panagenda.

NOTE: The CSV is identical to the building data information customers would upload to Microsoft CQD <https://docs.microsoft.com/en-us/microsoftteams/cqd-upload-tenant-building-data>

Example file:

[panagenda_Network_example.csv](#)

Please open a support request at panagenda if you want to use this information inside of your TrueDEM Portal.
