

# MC Upgrade - 12.0.41

This page was moved to [MC 12.0 - Upgrade Release Notes](#)  
Click in the link above if you are not automatically redirected in 10 seconds.

 This component release is part of [MarvelClient 12.0](#)

<b>FIX</b>	Fixed an issue where InstallFinishedTimeout was not honored when displaying the IconFinder / a success message dialog when running as SYSTEM
<b>NEW / ENHANCEMENT</b>	Added a new feature to display an optional logo.png/logo.gif (png takes precedence if both exist) at the top of upgrade messageboxes (except the IconFinder, as it would become too large)
<b>NEW / CHANGE</b>	DLL files in CopyTo... folders without the overwrite suffix will now also be overwritten if the source file is newer than the target file
<b>NEW</b>	<p>EXTMGR_ADDINS, AddinMenus, and NSF_HOOKS notes.ini entries are now processed as follows:</p> <ul style="list-style-type: none"><li>- if notes.exe is found in NotesProgramDirectoryNew, all entries are removed for which the bitness does not match</li><li>- if a pmc64(.dll) entry is found, but no such binary, and a 64 bit pmc.dll binary exists, the entry is changed to pmc.dll</li><li>- for entries which point to a binary which exists in both the program and data directory, the binary in the data directory is deleted</li><li>- in case multiple entries point to a MarvelClient binary (whether Essentials or licensed), only the newest binary and corresponding entry are kept</li><li>- in case entries point to a mix of MarvelClient Essentials and licensed binaries, the newest licensed binary is kept (even if older than the newest Essentials binary) (If the common data folder contains pmc_data.dll or pmc64_data.dll and a corresponding entry exists, the newest Essentials binary is kept)</li><li>- entries pointing to non-existent binaries (in shareddata\common, program, or data, or (accessible) filename) are removed</li></ul>
