MC Config - 20181004113200

ⓘ This component release is part of MarvelClient 10.0

ENHANCEMENT	Buttons are now translated, too
ENHANCEMENT	The link "--> Analyze" at the top left of the MC Config database has been improved
ENHANCEMENT	On the When and Who tab, display lists for all selected Conditions/Access Definitions have been added to also see selected Conditions and Access Definitions that are otherwise not visible in the selection list windows
ENHANCEMENT	New IP Adapter Conditions can now be created directly on the When tab
ENHANCEMENT	Desktop Icon Actions now display the highcolor icon of the source database after (re)saving and re-opening
ENHANCEMENT	The General\Modify Access Control … and General\Modify Conditions … actions have been enhanced for better usability
FIX	The text for the option "Update Internet Password when Notes Password …" has been improved in the ID-File Action
FIX	Fixed button "Past Database Link from Clipboard" in various actions for Notes 9.0.1FP9 and up
FIX	Fixed numerous German translations, such as options for "Every nth day of the month" in Time Conditions
FIX	Fixed Sametime notification messages field validation
FIX	The previously visible "debug" fields at the bottom of the Online Update form are now no longer displayed
CHANGE	Added a new Welcome Screen which is displayed when opening the Config database. The Welcome Screen displays information about the new v10 Release, MarvelClient Essentials and more. The Welcome Screen can be disabled for existing customers using the following ACL role: [HideEssentials]
CHANGE	A new role [HideEssentials] for existing MarvelClient customers allows to hide the new MarvelClient Essentials view, as well as Runtypes in Actions and the Welcome Screen
CHANGE	A new role [iQ.Suite] has been added to use the previously always visible action "iQ.Suite Integration" from within the view "Attachment Blocking\Filespecs"
CHANGE	The Navigator has been improved, including the addition of a new "MarvelClient Upgrade" section.
CHANGE	The "Check for Update" button in Online Update is now hidden for Notes Releases < 9.0
CHANGE / ENHANCEMENT	Online Update has been enhanced to also support updates of MarvelClient Essentials (MCE). When using a license key for Online Update, MarvelClient Upgrade components are now downloaded into MarvelClient Upgrade\Files, too (if within licensed scope).
NEW	A new action menu option "X. Advanced\Create a stub actions.xml" has been added to help create a stub actions.xml from all enabled Actions categorized as "Stub actions"
NEW / ENHANCEMENT	The DLL (MC binary) Update Action now has a new option 'Always detach binary/"DLL" to Notes data directory'. If checked, MarvelClient can update itself, even if the current binary is installed in the Notes Program directory.
NEW / ENHANCEMENT	Added button "Check Formula" to Advanced\JFOR. Notes @Formula" Action
ENHANCEMENT	Added new Notes V10 option to User Preferences: Enable Reply/Forward as MIME
