

MC Config - 20190415124500

 This component release is part of [MarvelClient 10.1](#)

NEW	<p>MarvelClient Upgrade Configuration Wizard</p> <p>In the view "MarvelClient Upgrade\Configuration(s)" you can now create full, ready-to-use MarvelClient Upgrade configurations with an intuitive wizard. The wizard will create and maintain all actions that are needed for you.</p> <p>Learn all about it in our MarvelClient Upgrade guide.</p>
NEW	List of indexed installers/programs to be used by Upgrade can now be maintained in the database in the view "MarvelClient Upgrade\Installers etc."
NEW	OnlineUpdate now downloads and updates MarvelClient Upgrade components. They can be found in the view "MarvelClient Upgrade\MCUpgrade Files"
ENHANCEMENT / NEW	OnlineUpdate now gives you the option to select which languages for Config and Analyze database to download.
FIX	Fixed an issue in OnlineUpdate where the "Download and apply updates" was not being displayed if only Upgrade components were selected for download.
ENHANCEMENT / NEW	Automate sync from SecurityInsider now also can maintain a list of all replica IDs for databases that have disappeared / have been removed.
CHANGE	The view "All Actions by RT, Prio, Title" will not display Essentials runtypes any more if the role [HideEssentials] is present.
FIX	Fixed an issue on the Who tab where excluded entries did not get displayed properly.
CHANGE / ENHANCEMENT	The menu action "Modify Conditions in selected actions" now will display a message box when it is finished.
FIX / CHANGE	The menu action "Modify Conditions in selected actions" will no longer unmerge from the "Only for" section if nothing will be left. This is done to prevent actions to become visible to every user by accident.
