MC dll/dylib - 10.0.22

ⓘ This component release is part of MarvelClient 10.0

FIX	Fixed an issue where the MC Eclipse plugin is getting reported as irregular due a problem finding the Eclipse directory. This is caused by Eclipse having trouble resolving "${env.USERNAME}". MarvelClient is manually fixing this by replacing it with the OS username it has.
FIX / CHANGE	<notes:notes_ini_path> will now be sanitized so it works without issues in all places.
CHANGE	The roaming, backup, roaming cleanup actions now have a new return value: "access_error" which is set to 1 if the roaming target cannot be accessed.
